**(Malaysian Time)**

**Advanced Certificate in Applied Sustainable Practice**  
**GPM Global (USA)**

Sustainability is no longer an option but a necessity in project management. This 3-hour online course offers a fundamental understanding of sustainable project management. It equips professionals with the essential knowledge and skills needed to integrate sustainability into project planning, execution, and monitoring. By the end of the course, participants will be prepared to lead projects that are not only successful but also environmentally and socially responsible.

# Topics Covered In This Course:

## Introduction to Sustainable Project Management

- Understanding the core principles of sustainable project management.
- Recognizing the importance of sustainability in today's business landscape.

## The Triple Bottom Line Approach

- Exploring the economic, environmental, and social dimensions of sustainable projects.
- Balancing project objectives to benefit people, the planet, and profits.

## Sustainability Assessment and Integration

- Conducting sustainability assessments for project planning.
- Integrating sustainability goals into project objectives.

## Stakeholder Engagement and Communication

- Identifying key stakeholders and their roles in sustainable project management.
- Effective communication strategies for stakeholder buy-in and support.

## Sustainable Procurement and Supply Chain Management

- Examining sustainable sourcing and procurement practices.
- Managing a sustainable supply chain for project materials and resources.

## Environmental Impact Assessment

- Identifying environmental risks and impacts of project activities.
- Developing strategies for minimizing environmental harm and enhancing sustainability.

## Learning Outcomes:

By the end of this course, participants will:

- Understand the fundamental principles of sustainable project management.
- Be able to assess and integrate sustainability into project planning and execution.
- Effectively engage with project stakeholders to ensure sustainability buy-in.
- Apply sustainable procurement and supply chain practices to project management.
- Recognize and address environmental risks and impacts in project activities.

## Who Should Attend?

This course is suitable for:

- Project Managers and Team Leaders
- Sustainability Managers and Officers
- Environmental and Social Responsibility Professionals
- Supply Chain and Procurement Personnel
- Business Owners and Entrepreneurs
- Operations Managers
- Anyone interested in incorporating sustainability into project management practices.

Islamic Economy Academy**

# Instructor's Profile

**Dr. Norsaudatul Akmar Mazelan** boasts an impressive array of qualifications, including a PhD in Strategic Management from the University of Hull, UK, an MBA from the University of Evansville, USA, and a BSc in Mathematics from the University of Malaya. She holds certifications as a Certified Green Project Manager (GPM-B) and a Registered Consultant and Assessor (RCA) from GPM Global, where she is also recognized as a GPM Global Ambassador.

With over 30 years of experience, Dr. Norsaudatul Akmar Mazelan has held senior management positions in a diverse range of industries, including banking and financial services, oil and gas, information technology, engineering, and professional services. Her primary expertise lies in sustainability and ESG consulting. She has a strong track record of developing and implementing sustainability strategies, conducting ESG assessments, and advising companies on ESG reporting frameworks like GRI and SASB.

In her capacity as a GPM Global Ambassador, Dr. Norsaudatul Akmar Mazelan is a prominent representative of the organization, actively promoting sustainable development practices within the business community. She also provides training and mentoring to individuals and organizations looking to enhance their sustainability efforts. Her impressive track record includes successfully guiding numerous companies from various industries to improve their ESG performance and attain their sustainability objectives. She has played a pivotal role in devising and executing sustainability strategies for companies, resulting in notable improvements in environmental, social, and governance outcomes.

Dr. Norsaudatul Akmar Mazelan is particularly adept at communicating intricate sustainability concepts and strategies to diverse stakeholders, including senior executives, investors, and regulators. Her presentation and report writing skills are exceptional, making her highly effective in conveying complex ideas and information. Furthermore, she has demonstrated strong project management skills, effectively leading and managing cross-functional teams to ensure the successful implementation of sustainability initiatives.
